

Incognito mode for your agents

Team

Hrishabh Ayush

Adarsha Mishra

Problem

- Your agents activity are public to the world
 - what agents search
 - what agents pay

Public payments expose spending.
Service providers hike prices
based on searches & requests

Transactions > Past 24 Hours

x402 requests made through known facilitators

Insights

- What if we gave your agents VPN?

We anonymize agents just like humans using incognito mode or VPN to find the cheapest price for a flight, hotel, API service, etc.

Designs

Demo

Technical aspect

How agents stay private and servers stay honest.

Blind tokens

unlinkable payments

RFC 9578 · Blind RSA-PSS

Attested enclaves

check the code before you pay

AMD SEV · pinned digest

AP4M x402

agents pay per API call

EIP-712 vouchers · Mastercard

Enclave wallet

nobody can move the funds

key generated in memory

RLUSD on-chain

real money, no replays

XRPL EVM · quote ID in calldata

Metered WireGuard

pay only for what you use

10 MB per token · nftables

Architecture

The agent's payments and its browsing never meet in one place.
